Redux	

PROFESSIONAL EXPERIENCE

Feb 2023 — Present

Front-end Developer at JJM Development

Poznań, Poland

- Took the lead in launching and driving a comprehensive initiative to reduce technical debt within the codebase, resulting in a substantial decrease in type system issues.
- Assumed ownership of vital business features and worked closely with the product team to ensure their successful implementation.
- Improved the release flow, implementing strategies that significantly reduced downtime and enhanced system availability, contributing to a more seamless user experience.
- Actively participated in ongoing efforts to enhance and optimize team development processes, fostering a culture of continuous improvement and efficiency within the team.
- Collaborated seamlessly with the startup's business team, fostering a dynamic environment for idea exchange and innovation.
- Embraced an agile mindset to swiftly adapt to changing priorities, ensuring the project's agility and responsiveness.

Oct 2021 — Dec 2022

Front-end Developer at DreamStorm Studios

Poznań, Poland

- Led the planning and coordination of a significant platform refactor while maintaining a top-tier contribution to the project's success through hands-on development.
- Proposed and implemented a Storybook UI component library, streamlining development processes and enhancing UI element consistency.
- Actively engaged in creating testing strategies to ensure top-tier code quality and a dependable user experience.
- Demonstrated growth by securing promotion from junior to mid-level Front-end Developer, taking on increased responsibilities, and expanding technical prowess.
- Developed strong interpersonal and communication skills while serving as a technical recruiter, enriching my overall skill set.

Aug 2021 — Sep 2021

Freelance Front-end Developer at Netzwind

Poznań, Poland

- Played a pivotal role in strategizing and implementing the initial version of a student information system, overseeing the architectural aspects, and ensuring a strong foundation for its success.
- Contributed significantly to a mobile application boasting over 50,000 downloads, delivering impeccable code and user-friendly functionalities that resonated with users.
- Collaborated closely with product owners to define project requirements and skillfully translated them into actionable features, fostering a harmonious collaboration that ensured project success.
- Maintained a relentless focus on the user by conducting thorough research, gathering valuable feedback, and consistently implementing iterative improvements, all aimed at delivering exceptional user experiences.

Jul 2021 — Aug 2021

React Native Developer Intern at Expansio Software House

Poznań, Poland

- Collaborated effectively within a dynamic team to construct a chat-bot-driven mobile application aimed at immersive learning, fostering innovation and knowledge sharing.
- Acquired invaluable insights into the end-to-end development process while thriving in a dynamic team environment, learning to navigate the complexities of app development.
- Took proactive initiative to revamp the internationalization solution, implementing a more robust and comprehensive approach to ensure broader support and improved user experiences.
- Leveraged the mentorship of seasoned developers to enhance proficiency in React Native development, gaining exposure to industry best practices and cutting-edge techniques.
